Veterinary-sanitary certificate for export of swine from the Netherlands to Japan

<b>I. IDENTIFICATION OF THE ANIMALS</b>	
Species	:
Number of animals	:
<b>II. ORIGIN OF THE ANIMALS</b>	
Name and address of the premises of origin	:
Name and address of the embarkation quarantine facility (facilities)	:
Embarkation quarantine period with starting and ending date	:
<b>III. DESTINATION OF THE ANIMALS</b>	
Name and address of consignee	:
Nature and identification of means of transport (Fill in flight number or name of the ship)	:
<b>IV. HEALTH ATTESTATION</b>	
I the undersigned, veterinary officer, certify that:	
(General requirements)	
1.	The Netherlands are free from rinderpest, foot and mouth disease (FMD), vesicular stomatitis, African swine fever (ASF), classical swine fever (CSF), swine vesicular disease, Nipah virus infection and porcine enterovirus encephalomyelitis;
2.	Vaccination against rinderpest, FMD, ASF and CSF as well as importation of cloven hoofed animals that have been vaccinated against any of these diseases are completely prohibited by laws of the Netherlands, in accordance with EU-legislation;
(Requirements for the premises of origin)	
3.	The premises of origin are free from clinical evidence of enzootic encephalitis (Japanese B encephalitis), rabies, anthrax, haemorrhagic septicemia, brucellosis, tuberculosis, melioidosis, blackleg, leptospirosis, salmonellosis, tularemia, toxoplasmosis, Aujeszky's disease, transmissible gastroenteritis, porcine reproductive and respiratory syndrome (PRRS), vesicular exanthema, porcine epidemic diarrhea, atrophic rhinitis, swine erysipelas and swine dysentery for at least

		12 months before the commencement of the embarkation-quarantine;		
	4.	The premises of origin are located in the Netherlands or third free countries only;		
	5.	The feeding of swill is prohibited in the premises of origin;		
	6.	No swine were introduced to the premises of origin where the exported swine were kept immediately prior to the embarkation-quarantine within 40 days prior to the embarkation-quarantine;		
(Requirements for the exported swine)				
	7.	The exported swine have not been vaccinated against brucellosis;		
	8.	The exported swine have been in contact only with swine born and raised in the Netherlands or the third free countries;		
	9.	The exported swine have been kept isolated and had no contact with animals other than the exported swine for at least 30 days immediately prior to the shipment to Japan in the embarkation-quarantine facilities approved by the government authorities of the Netherlands as a secured and guaranteed place from an animal health point of view;		
(Requirements for the examinations)				
	10.	The exported swine were individually subjected to the serological test using the neutralization test or enzyme-linked immunosorbent assay (ELISA) for CSF within 30 days prior to the embarkation-quarantine in item 9. All swine tested during this period were negative in order for the entire group to be eligible commence the embarkation quarantine for export to Japan;		
		Disease:	Method:	Date:
		CSF	Serum neutralization test or ELISA	
	11.	The exported swine were subjected to the following examinations with negative results by the government authorities of the Netherlands during the embarkation-quarantine period. Both for CSF and PRRS, all swine tested during the embarkation-quarantine period are negative in order for the entire group to be eligible for export to Japan;		
		Disease:	Method:	Date:
		CSF	Serum neutralization test or ELISA	
		Aujeszky's disease	Serum neutralization test or ELISA	
		Brucellosis	Tube agglutination test (less than 50 IU/ml)	
		PRRS	ELISA (for both of the European and the American antigenic types)	
		Leptospirosis	Microscopic agglutination test for <i>L. pomona</i> , <i>L. hardjo</i> , <i>L. canicola</i> , <i>L. grippotyphosa</i> and <i>L. icterohaemorrhagiae</i> (less than 50% agglutination at serum dilution 1:400), or dual medication of dihydrostreptomycin at 25 mg/kg with an interval of 10 to 14 days.	
		Porcine epidemic diarrhea (PED)	PCR test using fresh feces	
	12.	The exported swine have shown no evidence of any infectious disease through the careful clinical inspection conducted by the government authorities of the Netherlands during the embarkation-quarantine period;		
(Requirements for transportation)				
	13.	All containers, vehicles and equipments to be used for the transportation of the exported swine were cleaned in advance of loading and were thoroughly disinfected		

		with disinfectant approved by the government authorities of the Netherlands under the supervision of the said authorities.
	14.	The government authorities of the Netherlands have informed the consignor that the following requirements must also be respected:
	(1)	All other containers, vehicles and equipments to be used for transportation for the exported swine must be cleaned in advance of loading and must be thoroughly disinfected with disinfectants approved by the government authorities of the Netherlands under the supervision of the said authorities;
	(2)	No animals are mix loaded with the exported swine at the time of shipment to Japan and the shipment is routed directly to Japan and no stops will be made in the route other than in the Netherlands;
	(3)	Feed and litter to be used during the transportation period of the exported swine to Japan are provided from the same source used for the embarkation quarantine;
	(4)	No additional feed and litter is allowed to be provided at any port during transportation of the exported swine to Japan.
